## PROJECTS

---

### Customer Relationship Management (CRM)

📅 02/2023 - 05/2023    📍 Location

CRM solves the problems of fragmented customer data, inefficient communication, poor customer service, ineffective marketing, and lack of sales visibility by centralizing data, streamlining communication, improving customer support, enabling targeted marketing, and providing insights for better sales management.

- Developed a mobile application for an industry and this app helped in configuring their work much more efficiently and helped them manage their sales.
  - Skills used - Flutter, Firebase and Figma
  - Github Repository Link - <https://github.com/VatsalKotha/CRM>
- 

### LinkedIn Recommendation System Using Machine Learning

📅 10/2022 - 12/2022    📍 Location

LinkedIn Recommendation System leverages machine learning algorithms to provide personalized recommendations for users based on their profile and by analyzing factors such as industry, location and our system suggests relevant job opportunities.

- Skills Used - Machine Learning, Python, Plotly
- Github Repository Link - <https://github.com/VatsalKotha/LinkedIn-Recommendation-System-using-Machine-Learning>
